

PDA Clock

Clock From Anywhere Local or Remote!

Features:

- Eliminates The Unavoidable Errors Associated With Manually Collected Data
- Features Easy Operation
- Provides Accurate, Reliable Data
- Runs On Your Existing Network
- Reduces Installation Costs
- Employees Can Collect Data From Any Remote Location
- Saves Money Over Conventional Time Clocks
- 12 User Programmable Function Keys *
- Supports Kiosk (touch-screen) Monitor
- Links/Syncs Directly To Your TA100 PRO Or GENESIS PRO/SQL Database

Portable Convenience...

Time America's PDA Clock can record employee time, track labor distribution, and allow entry of other source data in a multitude of industries including home health care, construction, delivery services, and many other businesses where employees are mobile.

PDA Clock functions as a simple to use data collection point for employee information. PDA clock can complement the management information systems you already have in place. PDA Clock runs on any portable device that utilizes Pocket PC. By automating your data collection process, you can eliminate the manpower and mistakes associated with conventional time cards thereby reducing both payroll costs and errors.

PDA Clock guarantees accurate, reliable input. Employees simply enter information through the keyboard, or by touch screen. PDA Clock collects this data and transfers it to your computer when the PDA is in its docking station, via the time and attendance software's standard polling processes.

PDA Clock uses the TA100 PRO or GENESIS PRO/SQL database to program the functionality of PDA Clock. PDA Clock's 12 function keys can be programmed to ask up to four levels of information.

PDA Clock gives you the option of entering transactions under the same employee number, eliminating the need to enter the badge/id number on each transaction, or changing badge number whenever necessary (i.e.; clocking in a group of employees)

What kind of data would you like to collect? Keeping track of employee time on various tasks and accurate accounting of your inventory is essential in determining productivity. PDA Clock provides an easy and cost effective means of gathering this type of data. If the data you're after can be entered through a keypad, PDA Clock can time stamp it, record it, and feed it to your computer. Put the power of automated data collection to use in your business!
