

Time America's TA715 Time Clock can record employee time, monitor productivity, control access and monitor inventory in a multitude of industries including restaurants, hospitals, health care facilities, banks, manufacturing, retail, hospitality, and many others.

The TA715 time clock functions as a simple to use data collection point for employee information. It can be linked to a variety of existing computer networks in your organization to complement the management information systems you already have in place.

The TA715 guarantees accurate, reliable input. Employees simply enter information through the TA715's keypad, by swiping a magnetic stripe, proximity, or bar code badge. Employee feedback is provided through audible accept/reject tones and displayed messages.

Communication between the TA715 and your computer is accomplished by one of Time America's polling and programming utilities or integrated time and attendance systems. Each of the TA715's 8 function keys can be programmed to ask up to four levels of information. The TA715 can be programmed to prompt employees for data input, display employee messages, validate job costing entries, restrict employee punching via a schedule, regulate employee access to restricted areas, control a bell and much more.

Features

- Eliminates Manually Generated Time Card Data
- Costs Less Than Other Automated Timekeeping Products
- Links Directly To Your Existing Computer System
- 8 Programmable Function Keys
- Alphanumeric Keypad
- Accept/Reject Tones
- Signal Control for Bells and Access
